

Claims:

1. A top-load sink/laundry combo, comprising:
a cabinet;
an automatic top-loading washing machine having a drum, which is suspended inside of the said cabinet;
a motor connected to the said drum;
washing process control and programming means;
connection means for water supply and a waste line;
a sink with a faucet mounted on the top of the cabinet and connected to the same water supply and a waste line;
shock absorbing wall anchoring means.
2. The top-load sink/laundry combo defined in claim 1 wherein said automatic top-loading washing machine is fitted for drying, another words it is washer/dryer combo.
3. The top-load sink/laundry combo defined in claim 1 wherein said automatic washing machine is removable attached to the cabinet under the sink.
4. The top-load sink/laundry combo defined in claim 1 wherein said automatic washing machine is pivotally attached to the cabinet under the sink.
5. The top-load sink/laundry combo defined in claim 2 wherein said automatic washer/dryer combo is removable attached to the cabinet under the sink.
6. The top-load sink/laundry combo defined in claim 2 wherein said automatic washer/dryer combo is pivotally attached to the cabinet under the sink.
7. The top-load sink/laundry combo defined in claim 1 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
8. The top-load sink/laundry combo defined in claim 2 wherein P-trap is mounted flush to the wall and configured on a way that the water

accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;

9. The top-load sink/laundry combo defined in claim 2 wherein said dryer has a condensation device.
10. The top-load sink/laundry combo defined in claim 2 wherein said dryer has a ventilation means, which are direct connected to the waste line bypassing P-trap.
11. The top-load sink/laundry combo defined in claim 2 wherein said dryer has a check valve, which prevents sewer smell from entering laundry.
12. The top-load sink/laundry combo defined in claim 2 wherein said dryer equipped with retractable ventilation hose.
13. The top-load sink/laundry combo defined in claim 2 wherein said dryer equipped with lint trap filled with water, which is automatically changed every washing or rinse cycle.
14. A top-load sink/laundry combo, comprising:
 - a cabinet;
 - an automatic top-loading washing machine having a drum, which is suspended inside of the said cabinet;
 - a motor connected to the said drum;
 - washing process control and programming means;
 - connection means for water supply and a waste line;
 - a sink, which is pivotally mounted on horizontal axle to the top of the cabinet, which allows to use said sink as an access door for said top-loading washing machine;
 - shock absorbing wall anchoring means.
15. The top-load sink/laundry combo defined in claim 14 wherein said washing machine is fitted for drying, another words it is washer/dryer combo.

16. The top-load sink/laundry combo defined in claim 14 wherein said automatic washing machine is removable attached to the cabinet under the sink.
17. The top-load sink/laundry combo defined in claim 14 wherein said automatic washing machine is pivotally attached to the cabinet under the sink.
18. The top-load sink/laundry combo defined in claim 15 wherein said automatic washing machine is removable attached to the cabinet under the sink.
19. The top-load sink/laundry combo defined in claim 15 wherein said automatic washing machine is pivotally attached to the cabinet under the sink.
20. The top-load sink/laundry combo defined in claim 14 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
21. The top-load sink/laundry combo defined in claim 15 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
22. The top-load sink/laundry combo defined in claim 15 wherein said dryer has a condensation device.
23. The top-load sink/laundry combo defined in claim 15 wherein said dryer has a ventilation means, which are direct connected to the waste line bypassing P-trap.
24. The top-load sink/laundry combo defined in claim 15 wherein said dryer has a check valve, which prevents sewer smell from entering laundry.
25. The top-load sink/laundry combo defined in claim 15 wherein said dryer equipped with retractable ventilation hose.
26. The top-load sink/laundry combo defined in claim 15 wherein said dryer equipped with water-filled self-cleaning lint trap and P-trap combo.

27. The top-load sink/laundry combo defined in claim 14 wherein said sink is splitted for at least two parts, where one part with a faucet is permanently attached to the cabinet and another part is pivotally connected to horizontal axle and to a flexible waste line pipe.
28. The top-load sink/laundry combo defined in claim 14 wherein said sink is split for at least two parts, where one part with a faucet is permanently attached to the cabinet and another part is pivotally connected to horizontal axle and has a quick pressure connection (coupler) to waste line.
29. A top-load sink/laundry combo, comprising:
- a cabinet;
 - a sink mounted on the top of the cabinet and connected to water supply and a waste line;
 - an built-in automatic top-loading washing machine with horizontally rotating drum, which is suspended inside of the said cabinet in accordance with the pitch of the said sink;
 - a motor connected to the said drum;
 - washing process control and programming means;
 - connection means for water supply and a waste line;
 - shock absorbing wall anchoring means.
30. The top-load sink/laundry combo defined in claim 29 wherein said washing machine is fitted for drying, another words it is washer/dryer combo.
31. The top-load sink/laundry combo defined in claim 29 wherein said automatic washing machine is removable attached to the cabinet under the sink.
32. The top-load sink/laundry combo defined in claim 29 wherein said automatic washing machine is pivotally attached to the cabinet under the sink.
33. The top-load sink/laundry combo defined in claim 30 wherein said automatic washing machine is removable attached to the cabinet under the sink.
34. The top-load sink/laundry combo defined in claim 30 wherein said automatic washing machine is pivotally attached to the cabinet under the sink.

35. The top-load sink/laundry combo defined in claim 29 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
36. The top-load sink/laundry combo defined in claim 30 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
37. The top-load sink/laundry combo defined in claim 30 wherein said dryer has a condensation device.
38. The top-load sink/laundry combo defined in claim 30 wherein said dryer has a ventilation means, which are direct connected to the waste line bypassing P-trap.
39. The top-load sink/laundry combo defined in claim 30 wherein said dryer has a check valve, which prevents sewer smell from entering laundry.
40. The top-load sink/laundry combo defined in claim 30 wherein said dryer equipped with retractable ventilation hose.
41. The top-load sink/laundry combo defined in claim 30 wherein said dryer equipped with lint trap filled with water, which is automatically changed every washing or rinse cycle.
42. The top-load sink/laundry combo defined in claim 30 wherein said dryer equipped with water-filled self-cleaning lint trap and P-trap combo.
43. The top-load sink/laundry combo defined in claim 29 wherein said sink is split for at least two parts, where one part with a faucet is permanently attached to the cabinet and another part is pivotally connected to horizontal axle and to a flexible waste line pipe.
44. The top-load sink/laundry combo defined in claim 29 wherein said sink is split for at least two parts, where one part with a faucet is permanently attached to the cabinet and another part is pivotally connected to horizontal axle and has a quick pressure connection (coupler) to waste line.

45. The top-load sink/laundry combo defined in claim 1 wherein said automatic washing machine is pivotally attached to horizontally suspended rotation axle in the bottom of the cabinet and having vibration-proof connection to the front panel, which is pivotally attached to the different horizontal rotation axle on the front of the cabinet.
46. The top-load sink/laundry combo defined in claim 2 wherein said automatic washing machine is pivotally attached to horizontally suspended rotation axle in the bottom of the cabinet and having vibration-proof connection to the front panel, which is pivotally attached to the different horizontal rotation axle on the front of the cabinet.
47. The top-load sink/laundry combo defined in claim 14 wherein said automatic washing machine is pivotally attached to horizontally suspended rotation axle in the bottom of the cabinet and having vibration-proof connection to the front panel, which is pivotally attached to the different horizontal rotation axle on the front of the cabinet.
48. The top-load sink/laundry combo defined in claim 15 wherein said automatic washing machine is pivotally attached to horizontally suspended rotation axle in the bottom of the cabinet and having vibration-proof connection to the front panel, which is pivotally attached to the different horizontal rotation axle on the front of the cabinet.
